

Glass Drip

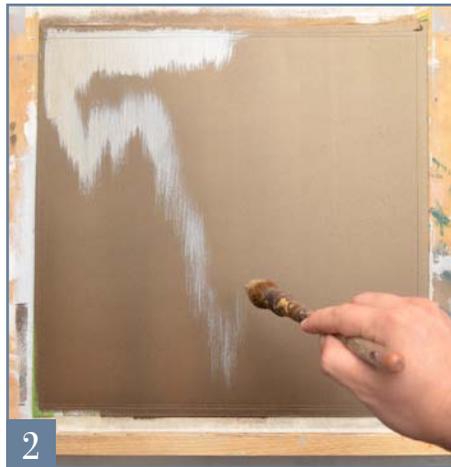

Jason Rosales | Limited Edition | Spring 2020

PRODUCTS

- Golden Paintworks Metallic Paint Tint Base Bronze
- Golden Paintworks Slow Dry Fluid Acrylic Carbon Black
- Golden Paintworks Metallic Paint Matting Additive
- Golden Paintworks Glass Bead Gel
- Golden Paintworks Glass Bead Gel XL
- Golden Paintworks Pre-Mixed Metallic Paint Moondust
- Gray Primer

TOOLS

- Mixing Container
- Stir Sticks
- Foam Roller or Low Nap Roller
- Chip Brush

HOW TO:

- 1 | **PRIME** and paint – a gray primer can help with coverage. Tint the Metallic Paint Tint Base Bronze with a nice dose of Slow Dry Fluid Acrylic Carbon Black for a darker shade. Add 1 part of the Metallic Paint Matting Additive to the ratio of 10:1 to your dark bronze Metallic Paint. This will provide a nice matte finish. Roll on 2 coats with your preferred roller and let dry (*Photo 1*).
- 2 | **USING** a quality brush, apply 2 coats of Pre-mixed Metallic Paint Moondust in a cascading style across the upper middle section of the space. Lightly feather out the edges as you go along. Let dry (*Photos 2 - 4*).
- 3 | **APPLY** the Glass Bead Gel in a vertical, stria manner over the Moondust with a chip brush, but not too thickly. Create drifts with large and small sections of Glass Bead Gel. Finesse to a feather's touch all over and along the edges. You can also add hints of glass beads in the bronze area below for added sparkle. As it's drying, the Glass Bead Gel will dry clear. Let dry fully (*Photo 5*).
- 4 | **APPLY** the Glass Bead Gel XL in the same manner (*Photo 6*). Create as chunky or refined a look as you desire and fill the rest of the space (*Photo 7*). As it's drying, the Glass Bead Gel will dry clear. Note that thicker application areas may dry more opaquely. Let dry fully.
