<p>* Quinacridone Magenta, Dioxazine Purple, and Ultramarine Blue are offered within the product range to produce a wider gamut of mixed colors for interior applications. These colors are NOT recommended for exterior, however if used in this manner a UV protective clear topcoat is required.</p> <p>** Opacity Ratings were assessed by peer review based on hand-painted brushouts of each color over a canvas panel of alternating black and white stripes. There are many factors that impact the perception of opacity, including surface texture, underlying colors, painting tools, and application method.</p>
